Google reCaptcha

1. In first step should create reCaptcha project…:
   https://www.google.com/recaptcha/about/

2. Save siteKey & secretKey

3. `pip install django-recaptcha`

4. `put in setting.INSATLLED_APPS:`
   '`captcha`'

5. **`Replace them in settings.py:`**
   `RECAPTCHA_PUBLIC_KEY = '`siteKey`'`
   `RECAPTCHA_PRIVATE_KEY = '`secretKey`'`

6. **`Add captcha to your forms:`**

```python
from django import forms
from captcha.fields import ReCaptchaField

class FormWithCaptcha(forms.Form):
    captcha = ReCaptchaField()
```

7. **`Add to form template`**

   `{{ captcha }}`
